

Jlj
 read the current minute → do the addition → place coins at the answer
 Inner circle is what you add of A2. The outside circle you dont add only the inner circle. If 28 it is 25+3 if it is 33 it is 30+3. If it is 49 it is 45+4 if it is 11 it is 10+1. You round down the 5 minute . And add the a2 inner circle
 First thing you do is look at the minute right now. Add the a2. The outside is you add 5 you dont pay atton. Lets say it is somthing 58 and 16 minute which is somthing 14 . You would move the coin on 55. And move it to 3. which is 58. But you want to mark 14 minute . How you wouldl do is put coin at 10. Then move the coin to the inner circle which is 4

Set up to 1 hour time with this using coins
 Use two coins . Any two coins

Forumal
 Both are minutes.
 A1 or a2 + B1

A1

↓ +15minute ↓ +15minute ↓ +15minute

↑ +45minute ↑ +45minute ↑ +45minute

This is not important it is 30 minute in the future

5/35	10/40	15/45
20/50	25/55	30/00
